The Facets of Resilience conference focuses on the topic of social resilience and its various layers and practical applications. Participants will have the opportunity to learn about the principles of general resilience theory, the different areas for which the topic of resilience is relevant today, and the specific practices that strengthen social resilience.

The aim of this three-day gathering is to develop a framework for promoting policies, based on robust scientific knowledge, that bolster social resilience in the face of the most serious challenges affecting us today.

The conference, featuring a number of leading international and national academics and experts, combines different formats of interaction: lectures, panel discussions, participatory workshops, an artistic performance, and open space, focusing on the following areas:

- Resilience of democracy
- Paradigm shifts in the Anthropocene
- Transformations of communities, organisations, and norms
- Resilience of democratic institutions
- Security and resilience: hybrid threats and kinetic warfare
- Social cohesion, care, and human rights
- Poverty
- Resilience and energy
- Living culture as a tool for social resilience

Konference Facets of Resilience se věnuje tématu společenské odolnosti v jejích různorodých vrstvách a praktických uplatněních. Účastníci budou mít příležitost seznámit se s principy obecné teorie odolnosti, s jednotlivými oblastmi, ve kterých je téma odolnosti v dnešní době důležité, a s konkrétními postupy, které odolnost společnosti podporují.

Cílem tří denního setkání je vytvořit rámec pro podporu politik, posilujících společenskou odolnost tváří v tvář nejzávažnějším výzvám, kterým v současnosti čelíme, a to na základě robustního vědeckého poznání.

Konference, na které vystoupí řada předních zahraničních a domácích akademických osobností a expertů z praxe, kombinuje různé formáty interakce: přednášky, panelové diskuze, participativní workshopy, umělecké představení nebo open space zaměřené na následující oblasti:

- Odolnost demokracie
- Změny paradigmatu v antropocénu
- Transformace komunit, organizací a norem
- Odolnost demokratických institucí
- Bezpečnost a odolnost: Hybridní hrozby a kinetické války
- Společenská koheze, péče a lidská práva
- Chudoba
- Odolnost a energetika
- Živá kultura jako nástroj společenské odolnosti
